**Third Quarter 2024 Weather(ly) Report
October 2024**

Wow, what a world we live in! With turmoil in the Middle East escalating alongside the Russia-Ukraine War, geopolitical tension continued to rise around the globe. Raw material prices reflected these concerns with gold and coffee price changes noteworthy, up 13.25% and 18.04% respectively during the quarter. In contrast, global markets, interest rates, inflation, and economic news remained fairly resilient. US equity markets delivered double digit returns, with the S&P 500 up 5.89% during the third quarter and 22.08% year-to-date. In contrast, the MSCI All Country World Index was up 6.72% for the quarter and 19.08% year-to-date.

As inflation continued to decline globally, central banks in the European Union, UK, and US decreased interest rates. The Federal Reserve cut rates by 50 basis points, or half a percent, at the September meeting, and alluded to more rate cuts on the horizon. This move by the Fed caused the yield curve to drop dramatically, changing from an inverted curve to be mostly positive, and helped 30-year mortgage rates to nearly touch 6%. Unemployment in the US hovered at a recent low of 4.1% and labor markets shed employees as technology advancements in artificial intelligence (AI) disrupted multiple sectors of the economy. The most recent example was the international longshoremen's strike, the first since 1977, threatening supply chains and increased logistics costs. As of this writing, the strike has been suspended and ports are re-opened, however the issues surrounding technology and automation are still to be negotiated. The service economy continues to show strength, which comprises over two-thirds of the domestic labor market.

Weatherly took several steps in portfolios to best position clients as we head into the final quarter of 2024. Our goal was to continue to move portfolios to neutral asset allocation, with a focus on retirement accounts for tax-efficiency, while simultaneously raising cash for required minimum distributions (RMDs) and qualified charitable distributions (QCDs) before year end. We shaved or sold specific raw materials, industrial and technology stocks to refocus sector allocations for the fourth quarter. Our largest portfolio holdings are highlighted below:

**** PERFORMANCE DISCLOSURE**

Please note, the Weatherly Asset Management (WAM) Equity performance is a mid- to large-cap value equity approach and the WAM Fixed Income performance is a high-quality intermediate-maturity investment approach. Performance numbers up to 12/31/05 are prepared in compliance with Association of Investment Management Research Performance Presentation Standards (AIMR PPS). Periods from 12/31/05 to 12/31/10 meet the requirements of the revised version of Global Investment Performance Standards (GIPS). Periods from 12/31/10 are calculated in a similar manner but GIPS standards no longer permit carve outs, therefore we no longer claim GIPS compliance. The gross fee returns shown above are presented after deduction of all transaction costs, but prior to the deduction of advisory fees and such other possible expenses as custodial fees. The net of fee return is calculated by subtracting the advisory fees. Investment advisory fees are described in Part II of Weatherly's Form ADV. For the 3rd Quarter 2024, the maximum quarterly management fee is 0.25% for Weatherly's Equity Composite and 0.125% for the Fixed Income Composite.

Composite returns consist of all 100% discretionary accounts under management utilizing individual stock and bond holdings selected by WAM. Balanced portfolio segments have been included in single asset composites. Effective 1/1/06 to 12/31/10, cash and cash returns have been allocated to the segment returns according to the procedures outlined by Association of Investment Management Research (AIMR). Effective 1/1/16, equity and fixed composite returns no longer include cash or a weighting to cash. Dividends and interest received is generally not reinvested in the same security but is included in total return calculations. Effective 2010, Equity Composite performance excludes two related family groups which hold a concentrated position that due to tax considerations cannot be managed in the same manner as the overall equity composite. The composite performance represents the performance of an aggregate of the firm's managed accounts that align with a particular strategy. Individual account performance will vary, and some clients may have experienced returns significantly different from the composite. Investing entails risk and past performance is no guarantee of future performance.

These performance numbers are provided under the flash reports provision of these said standards. "As prospective and current clients have received past results that were in compliance with the required disclosures within a 12-month period, firms may present interim data and returns (i.e., "Flash numbers") without quarterly disclosures." A full presentation, including all required disclosures, is available upon request. The WAM Balanced Composite represents actual portfolios utilizing strategic asset allocation with both equity and fixed income components. The fixed income component for individual portfolios underlying the balanced composite have allocations tailored specifically for that account and client, and varies between 5% and 90%, whereas the Blended Benchmark is 50% S&P 500 Total Return and 50% Merrill Lynch 1-3 Year representing an average of a 50% Equity and 50% Fixed Income benchmark allocation in the Composite.
